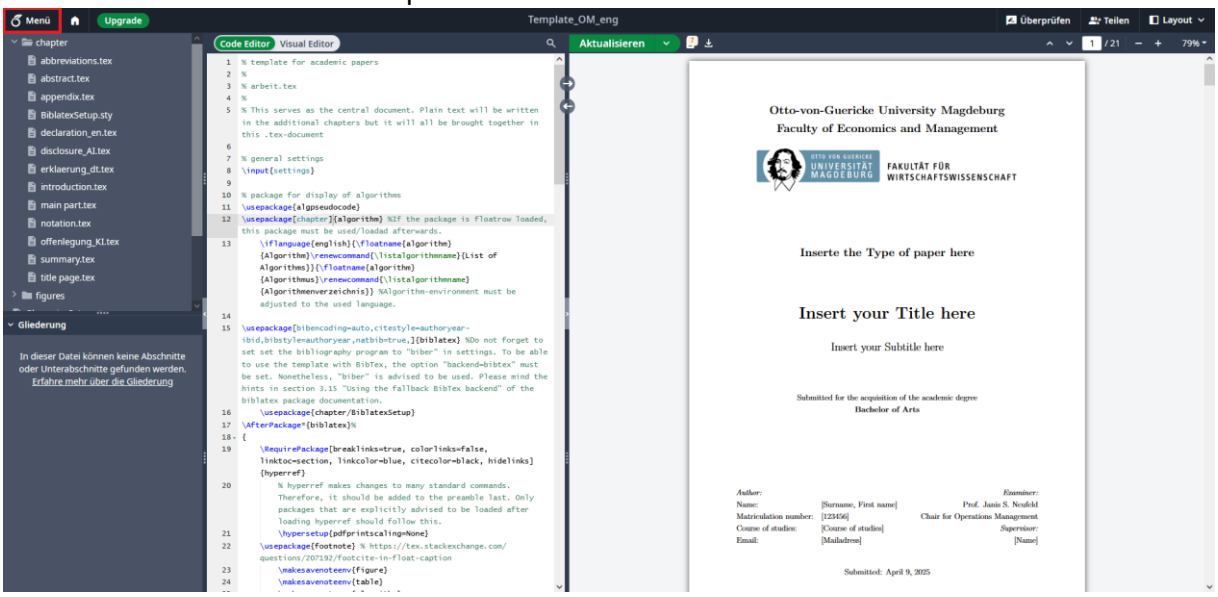
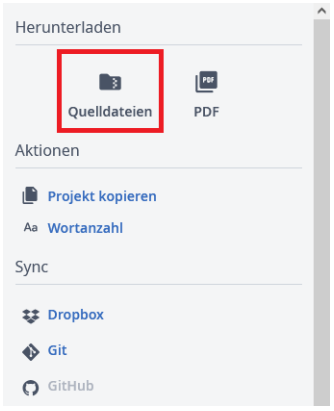
Guidance usage LaTeX

The LaTeX template is provided via the share LaTeX service “Overleaf”.
The Premium Service of Overleaf is free for students of the OvGU. It can be accessed via the link https://de.overleaf.com/edu/ovgu. The default setting is that the LaTeX document can be accessed, but no changes can be made. The reason for this is that students would otherwise change the template for all other students.
Consequently, there are two ways to use the template.
1. Use of Overleaf:
The template must be downloaded and uploaded as a separate project. To do this, follow the steps below.

1. Select “Menu” in the top left corner.



2. Choose „source file“ and download the zip-file.



3. Go to the overview of your own projects.
4. Click „New Project“ and choose „Upload Project“.
5. Drag and drop the downloaded zip-file into the field „Upload project as zip-file”.

The template should now compile itself. If this is not the case, it is possible that the main document was set incorrectly when the project was created. This can be checked. Correctly, “main.tex” must be selected under “Menu” under “Main document”.

2. Usage of an alternative Editor:
    1. Download the .zip-file, just as previously described.
    2. Unpack the .zip-file.
    3. Open Tex-Studio.
    4. Under “File” —> “Open” select the document “main.tex”. The chapters included in the “main.tex” document are automatically loaded. The document can now be compiled by clicking on the green arrow.
